AI-IN-RESIDENCE FOR SMES

A part-time team member whose job is AI

One day a week inside your business for 12 weeks. We work with the systems you already have, take on what's holding the business back, and leave one of your people in charge of each process. For businesses with roughly 5 to 100 staff, in any industry.

What we take on

Work that crosses teams

Systems that don't talk to each other

Decisions stuck in spreadsheets

Know-how in a few people's heads

Checks nobody has time for

Growth that brings more paperwork

How the 12 weeks work

Find (weeks 1 to 2). We shadow your team, measure where the hours go and pick the three biggest time sinks.

Pair (weeks 3 to 8). We build an AI workflow for each one, put a named person on your staff in charge of it, and train that person.

Run (weeks 9 to 11). The workflows run live. We measure the hours given back and fix what breaks.

Hand over (week 12). You get your AI playbook and a final scorecard. Then you choose: we keep the workflows running, or your team takes them over.

Your data, your rules

You choose how much access we have, from none at all upwards. You own every account and all your data.

What it costs

Pay from A$900 to get started.

One process: from A$1,800 to set up, about four weeks.

AI-in-Residence, 12 weeks: from A$4,900 to set up.

Then: A$25 for each hour given back, up to a monthly cap of A$3,500 to A$7,000, set by your team size. Stop any time with 30 days' notice once set-up is finished.

Your price depends on the work, and you get a fixed price before you commit. You pay for and own your AI tool accounts, usually A$100 to 600 a month. All prices exclude GST.

THE WEEK-4 PROMISE

If we haven't found at least 5 hours a week to give back by the end of week 4, you can stop and owe nothing more.

What we won't do

We never build AI to cut your team or monitor your staff. One of your people owns every process.

The next step

A free 30-minute call. Bring us your hardest problem. If AI isn't the right answer, we'll tell you.
